PCN 002-2024: V30 FUSE WITH HEAT SHRINK TUBING

Prepared by: SYNRAD PRODUCT MANAGEMENT & ENGINEERING

SYNRAD PCN 002-2024

The Synrad Engineering team has implemented an improvement to the v30 power cable and fuse assembly. The fuse holder will now include heat shrink tubing to prevent scratches on the wire jacket during the assembly process. The location of the heat shrink is indicated by the yellow arrows in Figure 1, below.

Figure 1. Previous power cable and fuse assembly is shown on the left, and the updated power cable and fuse assembly is shown on the right.
